

Output Information Name (Output Information Code)			Relevant B/L List Reference (Ocean (Master) B/L) (SAS147)																			
Item No.	Column	Field name	Attribute	Length	Repeat 1	Repeat 2	Condition														Code	Output Condition/Format
1		Output Common Field	an	398			M															Output the following items on a mail subject. - Vessel Code 9-digits - Voyage Number 10-digits - Carrier Code 4-digits
2		Process Result Code	an	75			M														Process Result Code	Output a Process Result Code returned by the system.
3		Query Type	an	1			M															Output entered Query Type.
4		Vessel Code	an	9			M														Call Sign	Output entered Vessel Code .
5		Voyage Number	an	10			M															Output entered Voyage Number.
6		Carrier Code	an	4			M															Output entered Carrier Code.
7		Port of Loading Code	an	5			C														UN/LOCODE	Output entered Port of Loading Code.
8		Port of Loading Suffix	an	1			C															Output entered Port of Loading Suffix.
9		Port of Discharge Code	an	5			C														UN/LOCODE	Output entered Port of Discharge Code.
10		Port of Discharge Suffix	an	1			C															Output entered Port of Discharge Suffix.
11		Total Number of B/Ls	an	4			M															Output the Total Number of Ocean (Master) B/Ls of the entered vessel information registered in Advance Cargo Information DB. (*) Exclude the following B/Ls; - Master B/Ls registered in AHR or CHR whose AMR or CMR has not been done. - B/Ls registered as "Original B/L Number" in BLL procedure. (B/Ls registered as "Original B/L Number still used after Association" in BLL are NOT excluded.)
12	100	B/L Number	an	35			M															Output Ocean (Master) B/L Numbers registered in Advance Cargo Information DB. (See body of Procedure Specification of "Inquiry about registered MB/L-HB/L List (IML)" for sorting conditions)
13	*	B/L Type Identifier	an	1			M															Output B/L Type Identifier registered in Advance Cargo Information DB. M: Master B/L O: Ocean B/L except Master B/L
14	*	B/L Type Discrepancy	an	1			C															Output B/L Type Discrepancy registered in Advance Cargo Information DB. *: When the entered B/L was registered in AMR or CMR procedure without entering 'M' in 'Master B/L Identifier', and yet the B/L has been related to House B/Ls registered in AHR or CHR procedure.
15	*	Advance Filing Completion Identifier	an	1			C															Output Advance Filing Completion Identifier registered in Advance Cargo Information DB. Y: Advance Filing has been completed
16	*	Departure Time Registration Completion Identifier	an	1			C															Output Departure Time Registration Completion Identifier registered in Advance Cargo Information DB. Y: Departure Time Registration has been done
17	*	Discrepancy Identifier (no House B/L)	an	1			C															Output Discrepancy Identifier (no House B/L) registered in Advance Cargo Information DB. H: AMR or CMR has been done, while AHR or CHR has NOT been done.
18	*	Discrepancy Identifier (Discrepancy in Vessel Information)	an	1			C															Output Discrepancy Identifier (Discrepancy in Vessel Information) registered in Advance Cargo Information DB. S: Discrepancy exists between vessel information of the entered Master B/L and that of the entered House B/L.
19	*	Discrepancy Identifier (Overdue Reporting)	an	1			C															Output Discrepancy Identifier (Overdue Reporting) registered in Advance Cargo Information DB. T: Overdue Reporting

Output Information Name (Output Information Code)			Relevant B/L List Reference (Ocean (Master) B/L) (SAS147)																		
Item No.	Column	Field name	Attribute	Length	Repeat 1	Repeat 2	Condition												Code	Output Condition/Format	
20	*	Prior Notification Code	an	3			C														Output Prior Notification Code of Risk Assessment Result registered in Advance Cargo Information DB.
21	*	Receiving Identifier of Prior Notification to Relevant B/L	an	1			C														Output when the entered Master B/L was registered via AMR or CMR, and Prior Notification Code of Risk Assessment Result has been registered to its related House B/Ls. *: Correspond to this case.
22	*	Under Process Identifier of Application for Cargo Discharge Permission	an	1			C														Output Under Process Identifier of Application for Cargo Discharge Permission (information that Cargo Discharge is still under application for permission) registered in Advance Cargo Information DB. Y: Cargo Discharge Permission has been applied, but has NOT been permitted yet
23	*	Type of B/L Number Association	an	1			C														Output Renumbering B/L Number Type registered in the Advance Filing DB if BLL procedure has been done. 1: Separate 2: Combine 3: Switch
24	*	B/L Number Association Identifier	an	1				M													When BLL procedure has been done, output the followings; A: Registered as "New B/L Number" in BLL procedure. C: Registered as "Original B/L Number still used after Association" in BLL procedure.
