(Note 1) For those with O in the Process Result column, the Process Results are output for each child procedure. (The Procedure Code of the child procedure is set to the procedure code in Output Common Fields)

(Note 2) Process Result Output (in units of processing) is output in units of 1 ocean B/L. (Example: When this procedure is processed in units of customs transit declarations (3 B/Ls for 1 declaration), 3 Process Result Output (in units of processing) are output.)
